Re: Verax Flanges for VAX Steam Turbines

Dear Jan,

ABB STAL has for their VAX steam turbines with success utilized flange connections of the Verax-type since August 1986.

So far ABB Stal has sold over 40 turbines equipped with flange connections of type Verax. The Verax flanges used were designed by the company Verax in March 1986 in accordance with ABB Stal purchase order number 60131-3400.

Best regards
